

CPAS Goes Live with Creative Actuary

Toronto, ON – February 21, 2011: CPAS Systems Inc. has launched a completely new web-based version of Creative Actuary. Creative Actuary v5 is a true “Software as a Service Application”, accessible over the internet from anywhere at anytime.

A number of regulatory changes are now coming into effect which, have made Creative Actuary v5 a required upgrade for the current user community, which numbers approximately 300 pension professionals around the world. Creative Actuary v5 is a powerful tool for actuaries, attorneys, accountants, financial planners, benefit administrators, and insurance professionals, who need to calculate annuity values easily and quickly.

The following key features available in Creative Actuary v5:

- ✓ Online internet access round the clock
- ✓ Automatic access to future releases and updates
- ✓ Full compliance with the new Canadian Institute of Actuaries requirements for Commuted Values that are effective January 1, 2011
- ✓ Produces commuted values for deferred pensions and death benefits
- ✓ Produces optional amounts for pension on any single or joint life pension form.
- ✓ Calculates pensions payable to married members (the actuarial equivalent of the normal form).
- ✓ Calculates actuarial equivalent pensions for early retirement.
- ✓ Calculates segregated rates using the method for PPA compliance (USA)
- ✓ Incorporates generational tables, which allow users to create static or projected generation tables
- ✓ Uses a number of mortality tables, including UP94 projected to 2020, sex distinct, or unisex tables based on percentages
- ✓ Stores and retrieves individual calculations for future use
- ✓ Exports factor data to standard applications such as Microsoft Excel.
